GitHub: github.com/Dharaneesh05 | **Portfolio:** dharaneeshc.tech | **LeetCode:** leetcode.com/u/DharaneeshC

CAREER OBJECTIVE

Artificial Intelligence and Data Science student with a strong foundation in programming, analytical thinking, and software development. Seeking an opportunity to apply technical knowledge to real-world challenges, contribute to collaborative teams, and build effective solutions while expanding professional capabilities and adapting to emerging technologies.

EDUCATION

B.Tech – Artificial Intelligence and Data Science (2023 – 2027) **CGPA:** 8.13
Kongu Engineering College, Erode

Higher Secondary Education (2022 – 2023) **Percentage:** 90.6%
KRP Matriculation Higher Secondary School, Namakkal

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript

Web Development: HTML, CSS, React.js, Node.js, Express.js, Spring Boot

Machine Learning: Scikit-learn, TensorFlow, Keras

Data Science Libraries: Pandas, NumPy, Matplotlib

Databases: MySQL, MongoDB, Redis

Developer Tools: Git, Docker, Postman, AWS

AREA OF INTEREST

- Full-Stack Development
- Machine Learning

PROJECTS

- **Smart Traffic Control & Decision Support System:** Built an AI-assisted traffic platform for vehicle detection, congestion forecasting, and intelligent route diversion. Combined traffic analytics with a control-room dashboard and mobile application to support traffic monitoring and operational decisions.

  Technologies: React, FastAPI, YOLO11n, ByteTrack, TFT | **GitHub:** Smart Traffic | **Live Demo**

- **Resume Analyzer and Builder:** Developed a full-stack application that reviews resumes for structure, content quality, and ATS compatibility. Used NLP-based analysis to identify improvement areas and provide relevant suggestions.

  Technologies: Python, NLP, Flask, MongoDB | **GitHub:** Resume Analyzer Builder | **Live Demo**

- **SmartFit:** Created an AI-powered sizing and virtual try-on application that estimates clothing and footwear sizes using computer vision. Applied visual analysis techniques to generate fit recommendations and improve the online shopping experience.

  Technologies: TensorFlow, OpenCV, MediaPipe | **GitHub:** SmartFit | **Live Demo**

CERTIFICATIONS AND ACHIEVEMENTS

CERTIFICATIONS

- Java SE 17 Developer – Oracle **Feb 2026**
- MongoDB Certified Associate Developer – MongoDB University **May 2025**

KEY ACHIEVEMENTS

- Secured First Prize at TechnoFest (**KEC**) for the SmartFit Return-Free Shopping System **Aug 2025**
- Received the Best Implementation Award at the BYTS Hackathon (**KEC**) for SmartTraffic **Apr 2025**
